Pupil Premium 2017/2018

The Pupil Premium is a sum of money, allocated by Local Authorities for the purpose of narrowing the gap in attainment between different groups of pupils. The basis of this allocation is taken from the School's Consensus which is returned in January of each year. Under the Pupil Premium guidelines issued by the Government, the grant must be spent by the school for the educational benefit of pupils registered at that school.

The School has received £21,849 for the current academic year, 2017/2018. Pupil Premium received in 2016/2017 was £13,140, for 2015/16 the School received £935, and in 2014/15 Pupil Premium received by More House School amounted to £2,805. Other funding was added to these amounts year on year in order for our school to support all pupils whom we believe would benefit from increased intervention. Our Pupil Premium funding is variable from year to year, consequently we therefore have made the decision as a School to add additional funds to the Pupil Premium received so as to make them as effective as possible in the activities selected, and thereby ensuring they really do make a difference to those pupils who attract the payments to the school.

The funds received for 2017/2018 of £21,849 have been used/allocated as follows:

Activities Selected	What this does	Targeted Pupils	Cost
Four new Interactive 'Clevertouch' smart screens for English classrooms.	The screens aid interaction and communication in the ways teachers teach and pupils learn. Chiefly, they provide a platform by which pupils become more engaged in the learning by interacting with the classroom display in order to present their ideas and test their understanding.	PP pupils and all students	£12,000
The purchase of 12 additional laptops for the English department.	Provides an improved ratio of laptops for students, improving pupils' access to technology for the recording of their ideas and promoting skills associated with the structuring and organisation of ideas into effective responses.	PP pupils and all students	£8,338
Subscription to Pearson Resource Software	Aids the delivery of the Mathematics syllabus and provides additional resources supporting the acquisition and development of pupils' numeracy skills.	PP pupils and all students	£1,224
Library additional purchase of books	Specific books selected to give greater choice for students, especially related to curriculum study. This improves pupils' access to research material and develops their independent learning skills. It affords increased resources for GCSE and A Level subject teaching.	PP pupils, and all students, but particularly those in KS4 and 5.	£761
Scanning Pens hardware	Technology promoting pupils' independence and confidence in accessing written texts, and especially to develop the skills to enable them to perform to their potential within public examinations, reducing the need for dependence upon staff acting as exam-readers and therefore reducing the impact of public examinations on the Learning Development Centre support for younger pupils during examination periods.	Years 10 and 11 students	£2,292
Kindle Fires –Library Technology	Supported by additional funding raised by The Friends of More House School, this has enabled the purchase of e-reading tablet provision to make independent access to electronic-based fiction and non-fiction texts more accessible, particularly for those pupils who might	PP pupils and all students	£1,500

	otherwise have limited or no access to such electronic reading technology at home or in school. This is part of our approach to promoting a love of reading and an independent freedom as readers for pupils with literacy difficulties.

The funds for 2016/2017 of £13,140 were used as follows:

Activities Selected	What this does	Targeted Pupils	Cost
Introduction of cookery into curriculum.	Extends the breadth of curriculum experienced by pupils. PP funded ovens, refrigerator and cooking resources. The school's parent-body - The Friends of More House School - and other school resources, funded the new kitchen units, islands and installation costs. This makes access to learning about healthy eating and the development of essential independence and life skills available for all pupils regardless of background and financial circumstances. The school provides ingredients for such pupils' use. This has subsequently developed independence within the students and focused on psychomotor skills necessary to succeed with lesson objectives and basic cooking skills.	Pupil Premium pupils and all students, but especially those in KS3 and 5.	£10,000
The creation of a new Activity Playground area.	PP enabled a project, part-funded by school funds, to improve the social experience and development of younger pupils in the school by providing opportunities for supervised social interaction between pupils with social communication and language delay whilst accessing a motivating adventure playground. The experience makes pupils' recreational time more productive in developing social confidence and team-work skills, providing a social focus. There are many added benefits relating to those pupils with Occupational Therapy needs. Improved independence has been clearly observable, with pupils	PP pupils and all students primarily in KS2 and, to a lesser extent, in KS3.	£6,696

	requiring fewer adult interventions to manage safely their play and friendships during break times and lunch times.		
Training of Head of Learning Development Centre.	Consideration of the management of Literacy tutors with a particular focus on dyslexia, whilst considering language and literacy needs. This has meant that we have developed the assessment we are able to complete within the school, particularly centred around Dyslexia and Speech and Language Difficulties. In addition, Speech and Language Therapists are updated on best practice and can implement this within our setting.	PP Pupils and all other pupils.	£2650
Purchase of an additional camcorder for our newly extended Media Suite.	Allows students to learn how to use a camcorder if not available at home for their personal use and supports their studies in Media at School.	PP pupils and others in Year Nine and above wishing to study Media at Levels 2 and/or 3.	£390

The funds for 2015/2016 of £935 were used as follows:

Activities Selected	What this does	Targeted Pupils	Cost
LDC Research	Funds supported a Speech & Language Therapist to undertake specific research on current students' learning styles.	PP pupils and all students in KS4.	£440
Maths Revision classes	Funds paid for extra support for students taking maths examinations.	PP pupils and others in KS4 and 5.	£575

The funds for 2014/2015 of £2,805 were used as follows:

Activities Selected	What this does	Targeted Pupils	Cost
Lucid Research Licence	Online Educational software that aids the screening of students from ages 15 to adults, comparing scores for	PP pupils and all students in KS5.	£1,616

	literacy skills and non-verbal reasoning against national data.		
Literacy Support	Extra 2.5 days per week provision of OCR L5 qualified Literacy Tutor for the benefit of reducing the size of our literacy-intervention groups, affording greater focus for individuals' literacy skills acquisition and development of confidence.	PP pupils and all students assessed with literacy intervention needs in KS2, 3 and 4.	£2,125
Nuffield Dyspraxia Programme	Provides opportunities for individual students, particularly those from disadvantaged backgrounds, to address a programme focused on developing their oral articulation such that they are enabled to communicate complex responses with greater confidence, better able to display the depth of their understanding and inference.	PP pupils and all others assessed to benefit from the programme.	£229
